

Curriculum support

The support provided by subject areas represents an important opportunity for embedding global learning in the life of a school: in the GLP-W this is focused on Key Stages 2 and 3. The GLP-W is developing a range of ideas, guidance, subject exemplification and [case studies](#), together with: recommended teaching and learning resources to enhance your understanding and your teaching of global learning.

As a 'by schools, for schools' model, the GLP-W encourages teachers to share good practice in global learning. The CPD sessions delivered by the programme and by GLP-W Lead Schools for school networks will enable you to understand and question what constitutes effective teaching and learning in development education, so that you are better able to identify useful [approaches](#) and relevant resources.

The GLP-W website will also enable GLP-W coordinators and other teachers to share ideas and upload resources produced during the lifetime of the programme
